

Project Design Phase-I
Proposed Solution Template

Date	19 September 2022
Team ID	PNT2022TMID08665
Project Name	Project – Smart Fashion Recommendation Application
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To suggest the matching set of clothes for the users based on their requirements.
2.	Idea / Solution description	To create a chatbot that gathers the requirements from the user and will suggest the best closet for the user.
3.	Novelty / Uniqueness	There is currently no existing system that is capable of recommending clothes based on the occasion. Different occasions call for different clothing. Moreover, a lot of fashion is based on the color combinations of outfits. A person with no or little fashion sense will have a hard time to decide on clothes that leave a lasting impression
4.	Social Impact / Customer Satisfaction	It reduces the time consumption and cost consumption through shopping in store. It also satisfies the customer with new innovations that mesmerise the users.
5.	Business Model (Revenue Model)	Now a days people don't have enough time to shop clothes, this application will be easier to buy clothes for them. So they will using e-commerce Clothing websites. So this makes the people to buy clothes easily and takes less time.
6.	Scalability of the Solution	It can be accessible to all the users simultaneously. There will be separate chatbot for every users that makes the users easy to make their choices of the close
